PROFILE

I became aware of coding from a close friend's interest in the field and through them, I was introduced to Nashville Software School's Full Stack Web Development Bootcamp. After spending several years in the music industry, I was ready for a career change and felt like coding was the perfect mix of creativity, logic and endless learning opportunities. I am looking forward to applying my skills in software development and believe with my varied work experience I will be an asset to any team.

CAPSTONE PROJECTS

Show Poster NOW!:

github.com/jimmymetts/Capstone-one

Show Poster NOW! is an application built using React, React-PDF, Bootstrap and CSS, that will allow artists & musicians to quickly create a digital, downloadable show poster from basic templates with limited, but well designed options. This will simplify and streamline the process of designing a show poster to promote an upcoming event, especially if you need it fast.

My Merch Tracker:

github.com/jimmymetts/MyMerchTracker3

My Merch Tracker is an application designed to help musicians, artists and managers keep track of their merchandise inventory. My Merch Tracker allows the user to create, edit and delete merchandise such as T-shirts, caps and accessories by description/category and track/update the quantities of each. This app uses C#, .NETCore, Identity and Entity Frameworks, as well as Bootstrap for a clean and minimal look.

EDUCATION

- **Nashville Software School**
Full Stack Web Dev Boot Camp
- **Belmont University**
B.A., Music Business
- **Mississippi State University**
Computer Science - no degree

EXPERIENCE

NASHVILLE SOFTWARE SCHOOL

JUNIOR FULL STACK DEVELOPER | APRIL 2019 - SEPTEMBER 2019

Intensive full-time software development boot camp focusing on full stack fundamentals and problem solving with both individual and team-based projects. Tech Stack: HTML, CSS, JavaScript, ReactJS, C#, .NET, SQL, JQuery, Azure and Bootstrap

- Developed individual and group projects using vanilla JavaScript, ReactJS, C#, ASP.NET, HTML5, CSS and Adobe XD
- Collaborated with 4 to 5 person teams on multiple projects building applications using GitHub and the full range of Tech Stack throughout the 6 month boot camp
- Implemented multiple APIs using Ajax with CRUD methods to request, receive and send JSON data to a server
- Developed app for creating and downloading PDFs using ReactJS, React-pdf, Bootstrap and CSS
- Made HTML5 and CSS animations for webpages
- Experience with NPM packages
